

Expect more from value-based kidney care

Interwell Health is a kidney care management company that partners with nephrologists on their journey to value-based care—with expertise, compassion, and vision to set the standard for the industry and help patients live their best lives.

We leverage technology, proactive interventions, the power of a nationwide nephrology network, and decades of experience to increase the ease and efficacy of care for chronic and end-stage kidney disease patients.

More scale

- 125,000+ CKD and ESKD patient lives and \$7 billion in medical costs under management

More value

- Guaranteed clinical and financial results in total-cost-of-care partnerships
- All program delivery costs at risk and only recovered if savings created
- A portion of savings at risk based on improved kidney disease quality outcomes

More results

- 20% fewer all-cause hospitalizations than the national average¹
- 85%+ more home dialysis starts than the national average
- 150%+ greater optimal start rate than the national average

Designed for more

Nationwide network of **1,800+ nephrologists** focused on value-based care

Local and virtual care footprint in **all 50 states**, with access to **2,600+ dialysis clinics**

Partnerships with **12+ regional and national payers**

The most provider-adopted **nephrology-focused EHR**

Unmatched predictive **analytics and data interoperability**

Multimodal patient **engagement and education**

¹ USRDS 2022 Annual Data Report, 2019 data.

Early intervention, better care

Interwell Health identifies the CKD patients at greatest risk of progressing using unmatched predictive analytics. Through clinical assessment, we deploy individualized, risk-based interventions to ensure we maximize cost reductions and make the biggest difference in patients’ lives.

Our visionary care model puts nephrologists at the center of the care team and patients at the center of the care.

Interwell Health is empowering affiliated nephrology practices at multiple levels to accelerate their transition to value-based care

- Nephrologist investors
- Risk adjustment support
- Nephrology-specific EHR
- Aligned physician economics
- Embedded resources within practices
- Enablement tools
- Customized practice support
