

# Kidney disease education that improves patient outcomes

The only kidney disease education (KDE) suite for patients that combines bilingual video content, one-on-one sessions with a clinical educator, printed materials, and more—all designed to deliver better outcomes.

## Delivering results for patients:

↓ **35%** decrease in central venous catheter (CVC) starts

↑ **138%** increase in home starts

↑ **24%** increase in starts outside the hospital

## Developed by nephrologists for nephrologists to help:

Streamline patient education with a turnkey solution, saving your practice time and resources

Empower patients to make informed decisions while improving patient engagement, understanding, and satisfaction

Increase practice revenue through eligible KDE billable service benefit\*

We're extremely pleased with our patients' response to Interwell Learning. It's engaging. It empowers patients to participate more actively in their care. It's also helpful for staff onboarding. This has been a tremendous success."

Susan Bynum  
Vice President of Clinical Operations  
Eastern Nephrology Associates, PLLC

\*This program was developed in conformance with Medicare's KDE reimbursement guidelines. Practices subscribe to Interwell Learning and bill Medicare directly based on the KDE benefit guidelines.
